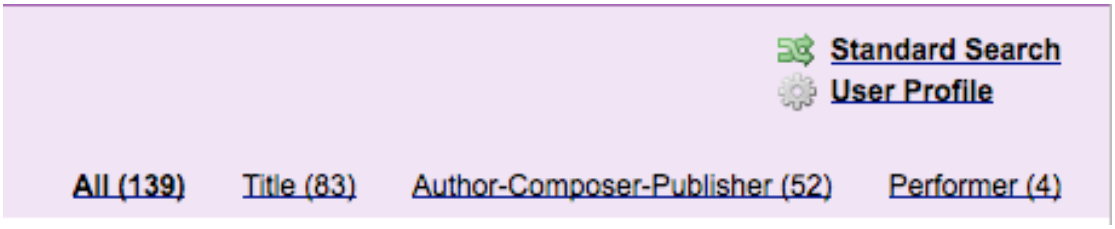
What is the ‘Post-Filtering’ Option?

In MWI when you perform a search using the ‘Quick Search’ there is a post-filtering feature allowing you to refine your search using the following criteria:

- Title;
- Author-Composer-Publisher;
- Performer.

Where will I find this Option?

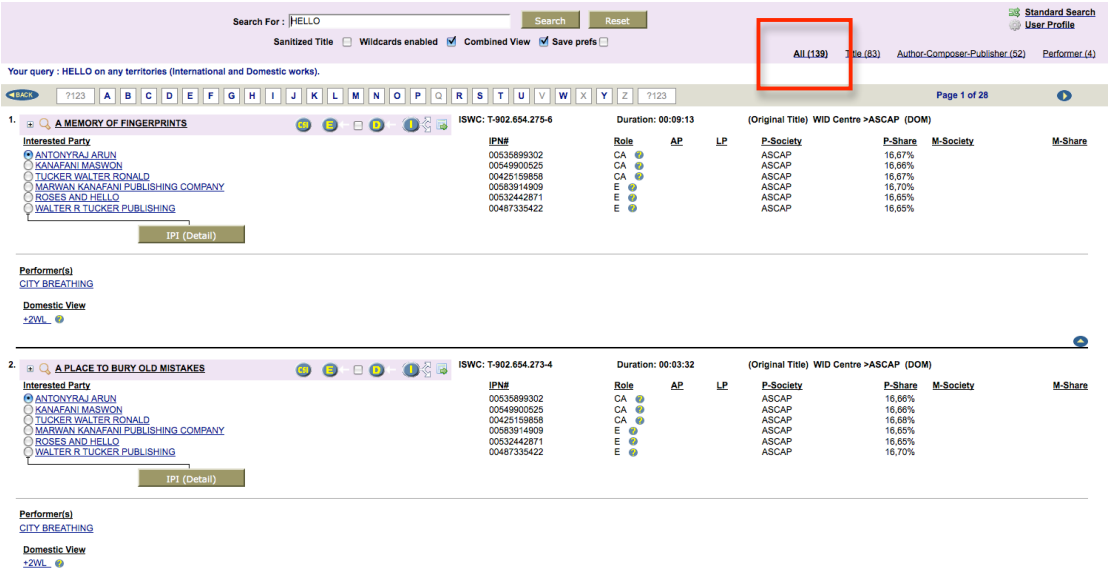
This option is available from the right side of the MWI Results page once you have performed a Quick Search:



How Do I Proceed with the Post-filtering?

First of all, perform a quick search (See Tips & Tricks # 13 for details).

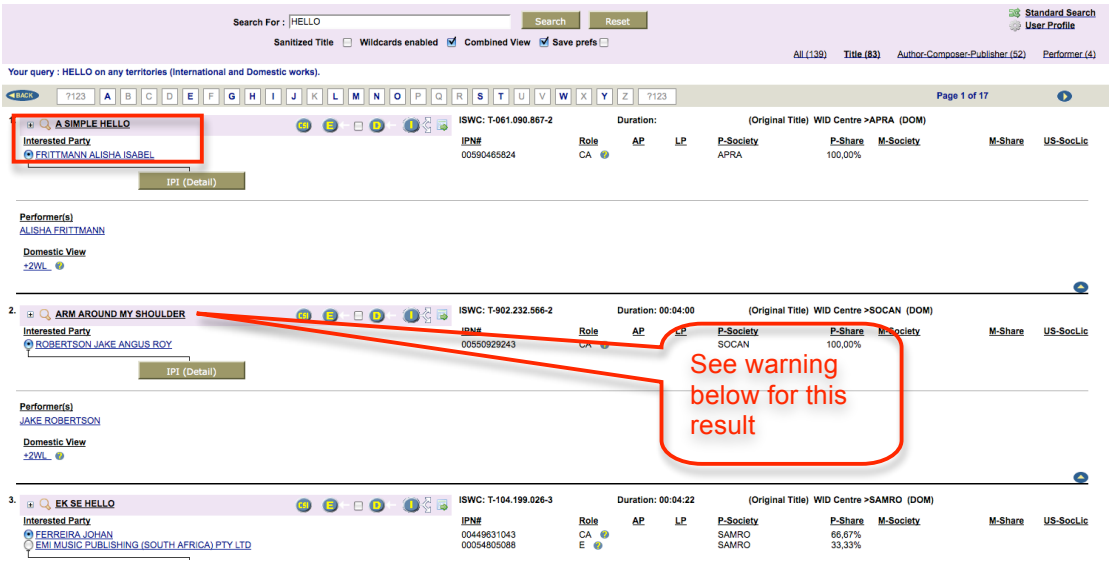
In the example below with a Quick Search on HELLO the results page show 139 results: all (139)



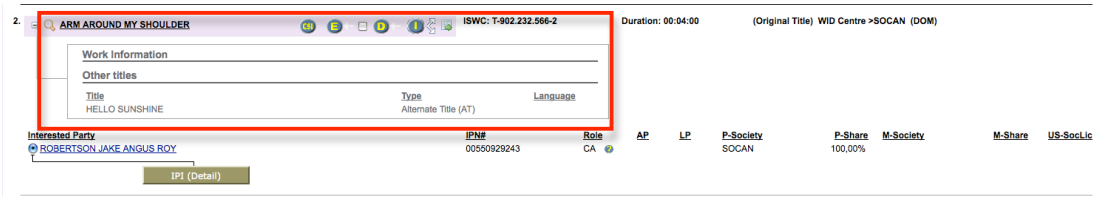
When results are displayed you can proceed to post filtering:

Filtering on Title

The results show 83 results on Title.
Click on the Title(83) hyperlink to get results showing the 83 results that contain the keyword HELLO in Title as shown below with A SIMPLE HELLO first title.



Warning! Please note the system also performs searches on Alternate Titles. In this case you need to expand the Results using the '+' sign on the left hand side of the title bar as it is shown below with the 2nd result in the list where OT is ARM AROUND MY SHOULDER and Alternate Title is HELLO SUNSHINE

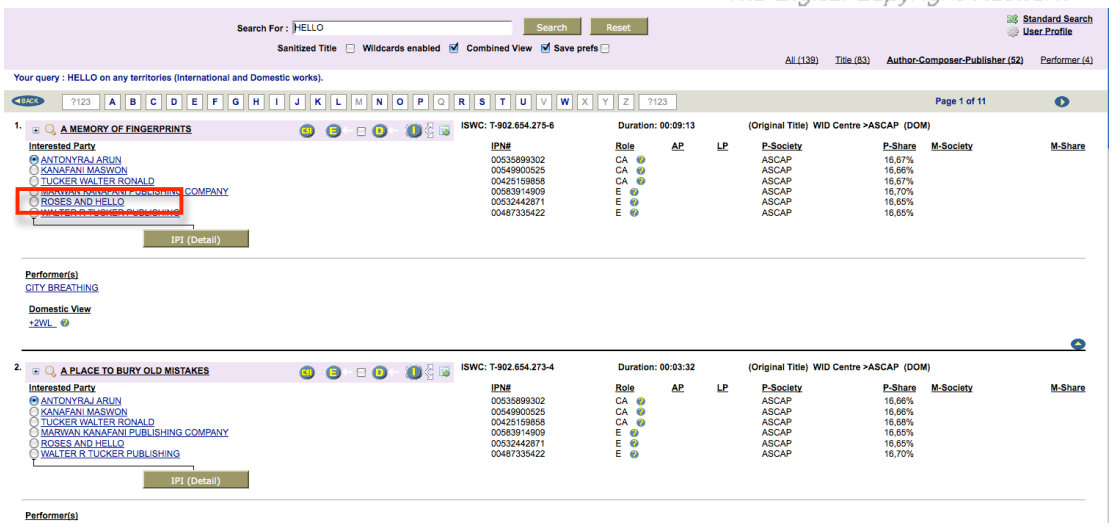


From this page you can:

- Go back to the previous page by clicking on the 'Back' button on top left, in the alpha navigation frame.
- Go to another filtering option by clicking on another hyperlink post-filtering option.
- Go back to all results page by clicking on All(xxx) hyperlink

Filtering on Author-Composer-Publisher

The results show 52 results on Author-Composer-Publisher.
Click on the Author-Composer-Publisher(52) hyperlink to get results showing the 52 results that contain keyword HELLO in Author-Composer-Publisher fields, as shown below with Publisher ROSES AND HELLO:

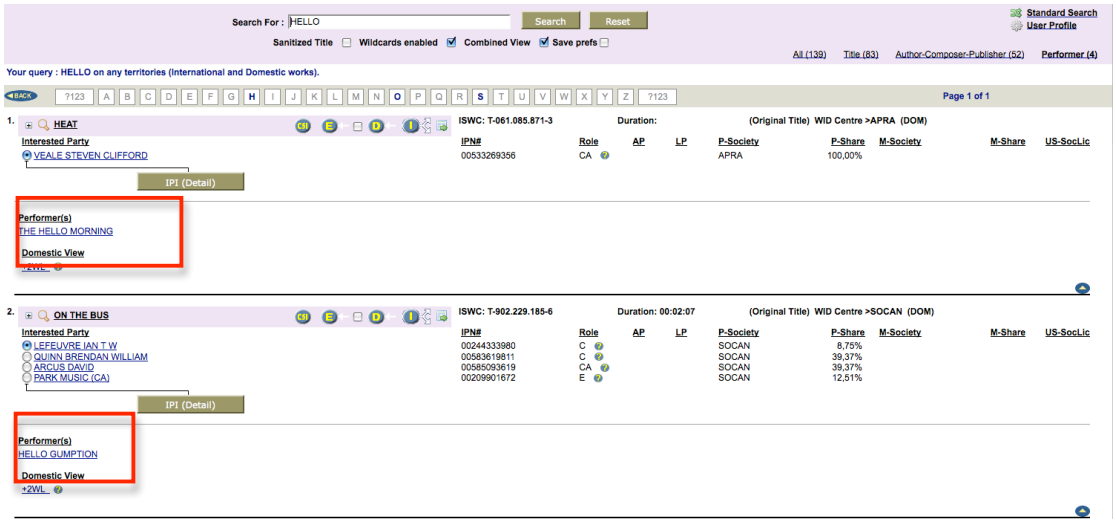


From this page you can:

- Go back to the previous page by clicking on the 'Back' button on top left, in the alpha navigation frame.
- Go to another filtering option by clicking on another hyperlink post-filtering option.
- Go back to all results page by clicking on All(xxx) hyperlink

Filtering on Performers

The results show 4 results on Performers. Click on the Performers(4) hyperlink to get results showing the 4 results that contain keyword HELLO in Performers field, as shown here below with Performers THE HELLO MORNING and HELLO GUMPTION:



From this page you can:

- Go back to the previous page by clicking on the 'Back' button on top left, in the alpha navigation frame.
- Go to another filtering option by clicking on another hyperlink post-filtering option.
- Go back to all results page by clicking on All(xxx) hyperlink

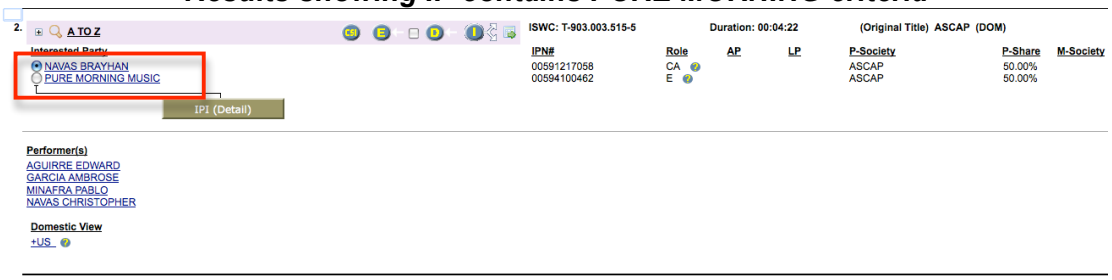
Why Should I Use the Post-filtering Facility?

As previously said in Tips & Tricks # 13 the Quick Search option can be used when you need to get a quick answer to a request for which you are not really sure of the exact search criteria, or when you are not comfortable with the idea of pre-filtering (= pre-selecting the search fields). This new type of search provides quick results you will then be able to refine with the post-filtering options provided with the results page.

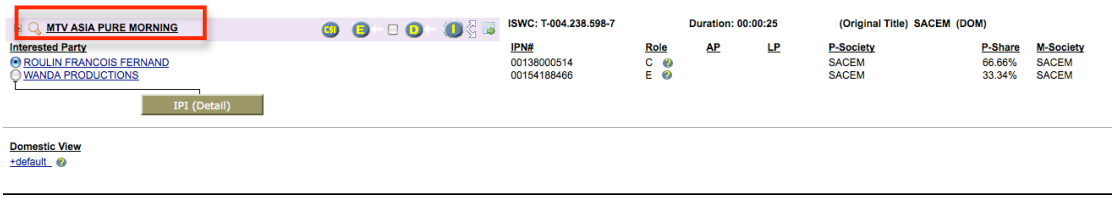
Warning (Reminder)!

If you perform a quick search on 'PURE MORNING', the system will perform a search on PURE and MORNING in each field (Work Title, Creators and Performers), meaning you will get results including a combination of PURE and MORNING in these fields: the system will search for the combination of PURE and MORNING in Work Titles, in Creators and in Performers fields.

Results showing IP contains PURE MORNING criteria



Results showing contains PURE MORNING criteria



BUT If you wish to perform a search on Title contains PURE MORNING and Performers contains MOLKO you need to use the standard search facility.
